### Description:

The term Transurfing has been created by the author and is the name of methodology of creating reality at your will and to your liking. Vadim Zeland says you are capable of influencing the course of your life and gives a scientific explanation of the laws that help you do this. The author builds up a scientific model, and speaks in detail about particular rules you should follow, providing a lot of interesting examples. The book introduces a system of specific terms, notions, and metaphors, which together make a truly convincing, thought-provoking theory of creating your own life. "You are ruled by circumstances and it will always be like that until you learn how to control your reality," says the author.

The series was started in Russia in early 2004 by Ves Publishing Group as a collection of five books. The first 3 parts together form the first work (trilogy) entitled "Reality Transurfing". Parts 4 and 5 are the second author's work called "Apples Fall to the Sky".

By 2009 four more books and DVD about Transurfing method have been released. By 2012 a new book "Hacking the Technogenic System" has been released so at present the collection consists of 10 volumes, illustrated 78-card deck and DVD.

**Description:**

If you want to know how exactly the Law of Attraction works and how you should use it, Reality Transurfing is a wonderful choice. Transurfing is a method for literally choosing your destiny, in much the same way as you would choose an item in a shop! In this first volume of the series, Zeland explains how to navigate what he calls 'the Space of Variations' - a metaphysical information structure storing scenarios of all possible events. According to the author, our dreams come from this space, as do clairvoyance, intuitive knowledge and insight. Particular thoughts can materialize in any sector in the space of variations, and what you have imagined will be realized.

### Description:

The second volume of the trilogy explains why desires aren't always fulfilled, and why dreams don't come true. For that to happen, you need to know how to ask for it. The book describes particular methods of asking. In this book, you will discover how to find your own Path. You will see that your possibilities are only limited by your intention. It answers the questions: what is choice, and how do you choose. It is well known that we need to understand the power of intention if we want our dreams to be realized. However, Vadim Zeland explains that there are two sorts of intention: internal and external, and that it is only when these two are in accord that manifestation occurs.

**Description:**

The third volume covers your place in space and time. You can move backwards and forwards in both. It comes down to making a transaction. You don't need to push the world in your ambition to achieve your goals. Also, to practise Transurfing - which is a method of allowing rather than making our desires materialize — you need to be healthy. In this book Vadim Zeland explains how to 'allow' good health to come to your life, instead of 'fight' for it. You will see that the world is going towards you with open arms. People will feel drawn to you without any explanation. In order to achieve your goals, you do not have to be strong and self-confident. There is another and a much more efficient alternative, a way of thinking and acting so that luck will always be on your side.

**Description:**

In everyday life things are happening despite what you want or don't want. There is a surprisingly easy way out of this: people don't realize they are trapped by a mirror illusion. In a sense the world is an endless dual mirror. On the one side of the mirror there is a material universe, on the other side there is a metaphysical space of variations, storing scripts of all events. It contains all that was, is and will be. The man mesmerized by the mirror thinks the reflection is the reality. But as soon as he wakes up and understands it is merely an illusion, amazing changes will start to happen in his life...

### Description:

Strange as it may seem, material universe has a mirror reflection — not illusory or invisible, but an objectively existing world, the presence of which reveals itself in some inexplicable phenomena. Should we be surprised that at the point where the two worlds adjoin, reality becomes controllable? The energy of thoughts does not entirely disappear — it indisputably influences the surrounding world in some way. But how can this energy be used? Why do our desires go unfulfilled and the worst expectations become a reality? Why do the commonly known visualization methods sometimes turn out to be effective, but in other cases they just fail? The reason is there is a missing link in the chain, without which all spiritual practices become a waste of time. And the secret is on the surface... It is so unbelievably simple, you can hardly accept it. The book tells you what the missing link is. Having received a key to controlling reality, you will discover the world where the impossible comes true. Although a lot of things will seem unusual, remember: they are not a plot of the author's imagination, everything is real.

### Description:

Space of Variations Tarot includes a 78-card deck and a booklet for the interpretation of the images. Vadim Zeland says you can learn how to control your destiny and create events without having to fight for what you want to be in your life. To be able to do it you have to study 78 essential Transurfing principles and this deck is a great tool. How do you use the cards? The first method is a step-by-step study of the Transurfing principles. Take a card at random every day and follow its guidance. Next day you can choose another card from the deck and follow its advice too, not forgetting the lesson of the previous day, though. Gradually, you will learn all the basic Transurfing principles. You can take notes about your new experiences and how your reality is changing. The second method is finding an answer to a question or a solution to a problem. Take the deck. Think of a question. Shuffle the cards and when you feel you are ready, spread them on the table. Then, spontaneously choose a card or a few cards with your left hand. Your left hand is ruled by your right brain hemisphere – or by your subconscious. Let your subconscious choose the cards, as it is linked to the metaphysical answer that you will get. The interpretation in the booklet will be your guide explaining what could be done in your situation.
