Inaugurated in 2006, this center was chosen and introduced as one of the four best projects in the Qom province by Industry Organization. By opening this center, production of various printing products requiring quality, precision and speed became possible.

In 2006, Isra' Publication and Printing Center received the Green Service Unit Award from the Department of Environment. In 2010, this center received the management standard of ISO 2008: 9001 from TÜV NORD of Germany.

God possesses two kinds of mercifulness for himself, the global and the special one, and these two qualities have been clarified in Qur'an and also for the Prophet. From one side, he commands: "I have the global mercy: (رحمتي . كل شيء) means that whatever could be involved in the object issue would be subject to my mercy". On the other hand, he utters: "The faithful people would deserve my special mercy: (فسأكتبها للذين يتقون)". There is no contrary for the global mercy, but the opposite side of special mercy is the wrath which is covered by the global mercy same as the special mercy, too. When we swear God for his common

mercifulness, it actually refers to the absolute blessing that has no opposite. Qur'an also represents the global mercy, because although it is for the guidance of the human, other beings which have been created according to the human requirements benefit from the Quranic grace.

Each Namaz has its own advantages. Among them, the noon Namaz<sup>1</sup> has a special feature. Qur'an utters: «حافظوا على الصلوات والصلوة الوسطى» the middle Namaz has been defined as the noon Namaz according to the quotations and traditions, which

<sup>1</sup> Namaz: Muslims should pray five times in a day; in the morning, noon, evening, after sunset (Maghreb) and before midnight (Isha).

was the first Namaz of the prophet (PBUH). It has been said that when the sun disappears from the circle of the meridian and noon reaches, do not let your noon Namaz be delayed because at midday the doors of mercy are open. Ask God for mercy. At this time, never just mind yourself or your parents or friends, but pray for all.

One of the rules of the war in Islam which is recommended that is the war should begin after the noon. It is grievous before noon unless the enemy attacks. In this case, responding to his attack could be done at any time. Even if the enemy's attack was in one of the four months named Haram months (Dhi Qaeda, Dhi Hajj, Muharram, Rajab), the defense would be obligatory. Beginning the war before noon is not advised, and it would be better postpone it after the noon. The secret of this matter has been mentioned in our jurisprudential texts basis on the quotations and traditions that since the doors of mercy are open at noon, maybe the god will guide the heart of the infidels and the hypocrites in order to orient Islam and not get blood.

The issue of law is one of the humanities and human sciences are not organized until human beings are known. The human will be also known when all his personal and collective prerogatives are examined and his relationship with the world is explained. However, the world should be known, because if the world does not be understood, the relationship between the human and the world is ambiguous. In the light of the explanation of this triangle, men can judge the human rights, and so long as these three mentioned matters are unknown, the wisdom determines that these rights are derived from the originator who has created the universe and human beings and has made the connection between them. Relying on the inside and outside wisdom, we will know how much the right of a woman and a man is, but the wisdom should be applied for understanding. The oppression and justice are subordinate to the delimitation of law which in turn is a subset of worldview and based on divine worldview, the glorified God, creates, develops and elaborates human beings, the world, and the relationship between them.

The issue of Velayat-e Faqih is one of the most important issues of the Islamic society, which is necessary for discussion of two items: First, Velayat-e Faqih is the cornerstone of Islamic Republic, and it is imperative for any Muslim and revolutionary person to know this fundamental principle well and move on its route. Second, the enemies of Islam and revolution understand that the anti-oppression feature of the revolution and the Islamic system originated from this important and progressive principle, so, in order to distract

such a system and revolution, they must attack the power-maker heart and its solid pillar. That is why after the victory of the Islamic Revolution, at any time, there are doubts about this unrivaled principle.

Of course, asking and exploring about Velayat-e Faqih, like asking about the principles of religion and revolution, is worth doing. Along with some doubts propagation, some scholars have so far done scientific research and intellectual analysis to respond to this natural and logical need and to clarify the dimensions and angles of this issue. They have presented the outcome of their work to a researcher-educated society, which should honor these honest endeavors. Before we turn to the main issue of the discussion, here proving Velayat-e Faqih and the explanation of its necessity, it seems necessary to clarify the conception and verification preliminaries of this issue. Otherwise, because of the lack of clarity of the subjective concepts of the derivative matters of the issue and their mixing together, or having inaccurate conception and verification, the percentage of inaccuracy and deviation will be very high.
